Ground excellence worldwide

BELLOTA

MORE Efficiency

The incomparable redesigned
sweeps maintain the Bellota
essence but now last longer.

MORE Constancy

The reshaped wings have a constant 270 mm working width maintained as they wear away with use.

NOW

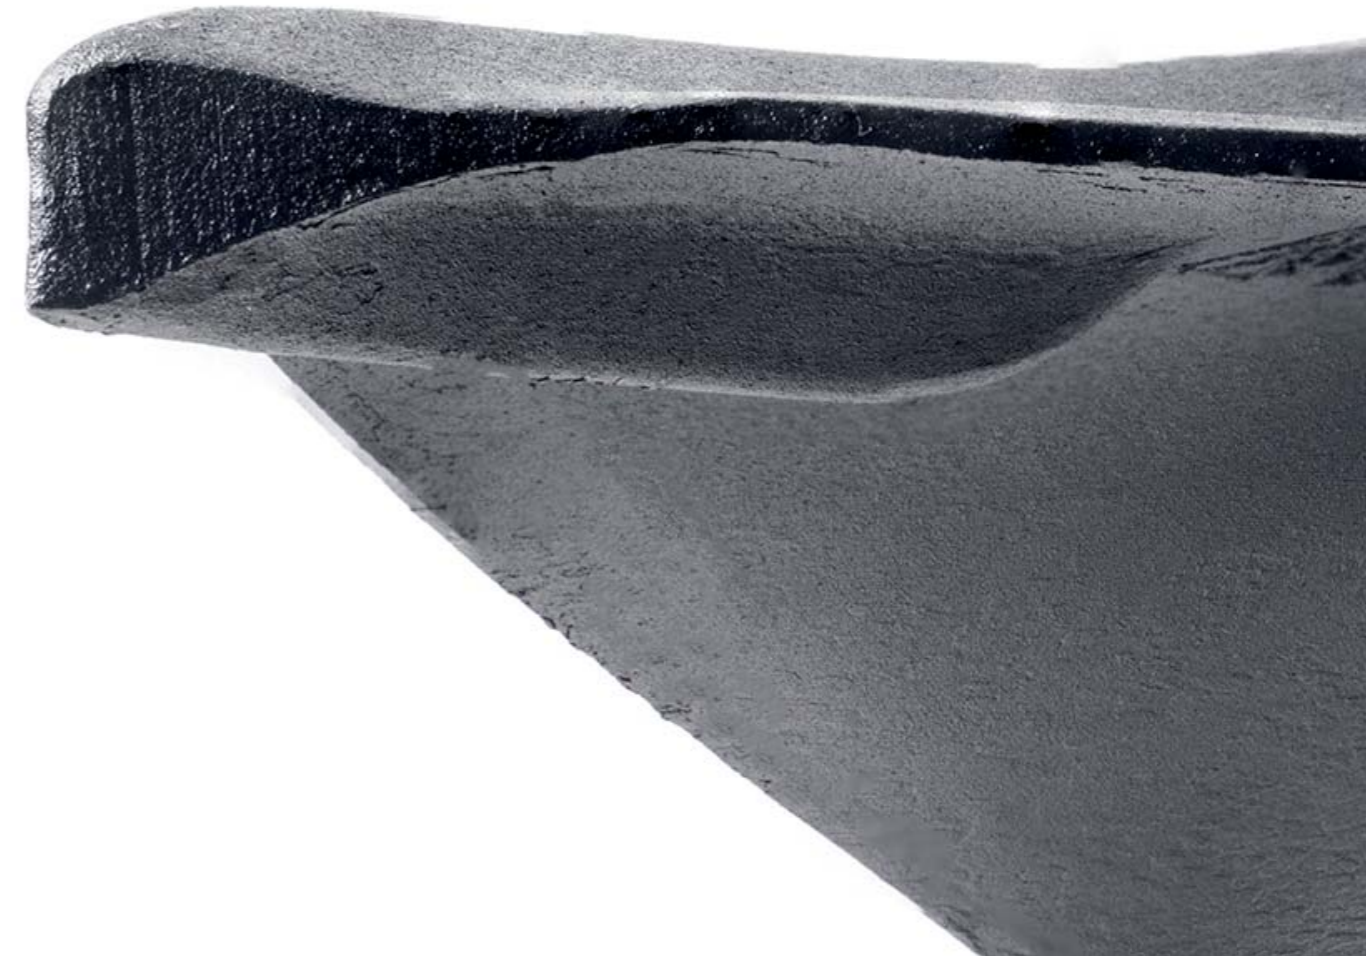

BEFORE

MORE Precise

With the two sides reinforced,
not only the point is always sharp
but also the sweep lasts longer.

MORE Protection

Thanks to a deeper countersink,
the bolts will always be protected.

MORE Variety

The 1512 model with 47° working angle will allow you to work with less working depth.
If more working depth is needed, the 1513 model has 35.5° working angle.
